

Ultimate II Control

The Ultimate II keypad allows you to choose a massage program, a light therapy program and the option to manually control your massage. It is easy and fun and we provide this graphic explanation so that you quickly gain mastery over the keypad.

MANUAL CONTROL

Press the channel massage button and use the plus and minus buttons to adjust the intensity of the body pressure massage.

Press the injector massage button and use the plus and minus buttons to adjust the intensity of the central nervous system massage.

PROGRAM CONTROL

Press the massage program button and use the plus and minus buttons to choose program 1, 2 or 3 then wait five seconds for the massage to start.

Press the light therapy button and use the plus and minus buttons to choose program 1 through 9 then wait five seconds for the light therapy to start.

The plus and minus buttons are used to adjust the two massage system intensities while in manual massage operation and used to select a program while in program operation.

The LED will show the temperature of the air in the operating system and will show program number choices during program selection. The LED will light up when it is over its power source.

Ultimate II Keypad in detail

- *Provides very gentle to vigorous massage to the meridiens of the central nervous system resulting in deep respiration, increased heart rate and blood flow.*
- *Basic function is ON and OFF.*

Ultimate II

Programs Explained

Massage Therapy Programs

RESTORATION

Program 1: 12 Minutes in Duration

Restoration will help your body restore the damage done to muscles, limbs and joints following intense physical activity, while at the same time restoring energy lost through exertion. What may have taken hours to damage and deplete, you can help repair and restore in twelve minutes.

RELAXATION

Program 2: 8 Minutes in Duration

Relaxation will increase your blood flow, deepen your respiration, loosen your muscles and skeletal structure and help you purge your mind of the negative thoughts that caused you to get uptight and in to emotional knots in the first place. What may have taken hours or days to begin debilitating you emotionally and physically, you can purge in eight minutes a day.

REST

Program 3: 10 Minutes in Duration

Rest will give your body and mind a break. For ten minutes you can stop consciously monitoring your body position and thoughts, and absorb the benefit of real physical rest. What you will gain in these ten minutes is the rest you so desperately need and feel you have no time for. We ALL need our rest,

Light Therapy Programs

Program 1: SENSUAL RED 

Program 2: POWERFUL BLUE 

Program 3: HARMONIC GREEN 

Program 4: INVIGORATING ORANGE 

Program 5: PASSION PURPLE 

Pre-programmed color sequences

Program 6: CARIBBEAN MIST 

Choose the joyful sensation of life in the Carribean. Lay back as a variety of blue and green hues envelope you. Drift away and imagine sailing the Carribean Sea and absorbing the rich evolution of colors the combination of sun, sand and water depth create. Imagine walking an island from its arid north to its tropical rain forested southern end and absorbing the panorama of colors you would experience.

Program 7: SUNRAYS 

Choose the emotional pleasure of basking in the subtleties of a day of sunlight. Absorb the invigorating charge of energy of a sumptuous sunrise as light transitions from a powerfully invigorating deep orange to a fresh yellow and then a mind clearing bright white. Enjoy the cycling transition as your energy levels are recharged.

Program 8: TWILIGHT 

Choose the soothing effect of an enchanted twilight. Let the sun go down and the hues of pink, red, purple and mauve melt the cares of your day into memory.

Program 9: RAINBOW 

Immerse in a rainbow of colors. Let the full spectrum of light bathe over you and put your in touch with many emotions as you sort out the complexity of what is on your mind with the help of color.

Ultimate II Scenarios

Get Comfortable

To get comfortable with the Ultimate II Keypad we encourage you to imagine a bathing experience and just press the buttons along with your imagined massaging bath and observe how the keypad responds to your desires. To help you do this we have provided two imagined massaging bath experiences below that will guide you through a sequence of choices and tell you how to make those choices happen. To practice you just need to run a bath then place the keypad in its control position with the LED lit showing the air temperature. Using the scenarios below press the buttons as indicated and you will see how the keypad responds. This may sound goofy but all we want for you is that you feel confident in managing the keypad and have fun in your bath.

Imaginary bath scenario one

It's Wednesday and the week has already been demanding. You are home a bit late feeling tired and frustrated. You need a massage to relax you and clear away the emotional baggage you have built up so that you can enjoy a good night's rest.

You run a hot bath get in and want to start a mood lighting program. You press the light therapy button and use the plus button to scroll to program #8 – Twilight. You remove your hand and five seconds later the light program starts. The program is calming.

You decide to select a relaxing massage program and press the massage program button and then use the plus button to scroll through the numbered selections that appear on the center LED until you get to program #2 -Relaxation. You remove your hand and five seconds later the massage program starts and you begin to wind down.

You open your eyes briefly and notice a color you really like and want to freeze the light on the color so you press the light therapy button to freeze the hue.

Six minutes pass and the massage program has you in a tranquil place and you decide to turn off the program and just run the injection system massage at its lowest intensity for the remainder of your massaging bath. So you press the combined massage button once to turn it off then press the aqua masseur injection system button placing it in control and press the minus button until you get to the remarkably calming and gentle low intensity setting. Twenty minutes go by and the system stops by itself. Slowly you get out of the bath, open the drain, towel off, get into your night clothing and crawl into bed. You wake up on Thursday morning feeling great and looking forward to the rest of the week!

Ultimate II Scenarios

Imaginary bath scenario two

It's Sunday night and you have spent the weekend using muscles you haven't used in a long time. You are beat up, sore and a little worried. You need a massage that will help your body heal, get you ready for a great night's rest and help you be ready for the week ahead.

You run a hot bath get in and want to start with a strong tissue massage so you press the health masseur channel massage button and then press the plus button until the massage is vigorous. You can feel it massaging your entire body and easing the tension in your skeleton and muscles and you just lay there enjoying this for a couple of minutes before adjusting the intensity down by pressing the minus key from time to time.

Then, because you feel better, you decide to add a light therapy program and press the light therapy program button and the LED shows program #1 – Sensual Red. You simply remove your hand and five seconds later you are bathed in deep red color. You then decide to adjust the channel massage down and press the health masseur channel massage button and then the minus button to adjust the massage intensity.

You are getting so comfortable that you want to let the system give you a massage rather than manually adjusting it so you press the massage program button and program #1, Restoration, shows up on the LED and you simply do nothing as that is the program you want and five seconds later the massage program takes over operation of both systems and runs the restoration program. You melt away for twelve minutes and then the program stops waking you from your blissful stupor. Slowly you get out the bath, open the drain, towel off, get into your night clothing and crawl into bed. You wake up Monday morning feeling great and ready to jump into the week ahead!

If you can imagine it, you can have it.

Your enjoyment of the Ultimate II Massaging System is limited only by your imagination! Please enjoy your massaging system baths for as long as you live in your current home.
